

JOHN T. BENTON IV

(678) 617-0440 ■ Buford, GA ■ jtbentoniv@gmail.com ■ <https://www.linkedin.com/in/john-benton> ■ <https://github.com/JohnBenton4>

Motivated professional excited to kickstart a fulfilling career in web development. Offers expertise grounded in Full Stack web development, training, data analysis, curriculum development, customer service, and small business ownership.

SKILLS

JavaScript (React, Node, Express, Angular) RestfulAPI, Git, PostgreSQL, Bootstrap, HTML, CSS, DOM, JQuery, JSON

Current Projects

Portfolio | [Portfolio-GitHub](#)

- React.JS based website that includes completed projects, information about me, contact information, and more.
- When complete, it will be visually tasteful with plenty of dynamic features.

Past Projects

Introvert Empowerment | <https://introvert-empowerment.herokuapp.com/> | [Introvert-Empowerment-GitHub](#)

- Full stack web application that provides encouragement, community, and practical exercises for introverts who would like to improve their spontaneity and out-going character.
- Repaired the challenge generator code after testing revealed bugs, and updated the message of the day after the API was edited
- Created using Node.js, React, Promise/API, Hooks, PostgreSQL, Javascript, HTML, CSS, Bootstrap

Date Idea App | <https://date-idea-app.netlify.app/> | [React-Date-Idea-App-GitHub](#)

- React app that takes the guesswork out of planning a date. The app uses 2 independent APIs; one provides the date idea, the second finds that date idea in your desired city
- Improvements were made so users can establish CORS access, and the "Search" function was created so the second API could receive information from the results of the first API.
- Created using JSX, HTML, and Bootstrap

Mood Game App | <https://mood-game.netlify.app/> | [Trivia-GitHub](#)

- Front-end game app that provides funny jokes for people who are feeling down and challenging trivia questions for people who are already in a good mood.
- Enhanced the visual aspect of the page with images in motion, and successfully enabled a dropdown when the user selects the correct answer for the trivia questions.
- Created with Javascript, HTML, APIs, DOM, and Bootstrap

EXPERIENCE

N-Hance - Operations Lead, Lead Tech - Alpharetta, GA

2023

- A 100% increase in jobs sold is directly attributed to my assumption of the procurement responsibilities from the owner.
- Improved workflow by minimizing gasoline consumption, miles driven, and vehicle loading time, enabling employees to consistently clock out at least one hour early on Fridays.
- Established procedures that increased business visibility by 50% and streamlined all communications by 25%.

Primerica - Senior Financial Analyst - Duluth, GA

2019 - 2023

- Achieved 100% satisfaction rate from end users who completed my systems training.
- Improved operational efficiency by 30% as a result of my coaching and new team member onboarding. My updated training methodology also improved employee performance.

Project Analyst

2017 - 2019

- 15 time PriAward recipient, an internal excellence accolade, in recognition of cultivating dependable employee rapport.
- Managed the credit card program with 500+ cardholders. Led finance system training and onboarded new users.

The Westminster Schools - Director of Percussion Programs - Atlanta, GA

2014 - 2017

EDUCATION

DigitalCrafts - Certificate in Software Development - Atlanta, GA

Software development training program covering full-stack development including JavaScript, HTML, CSS and more.

The University of Georgia - Master of Music in Percussion Performance - Athens, GA

Samford University - Bachelor of Music in Music Education - Birmingham, AL
